

## Fyndlista Ullstämmaskogens naturreservat 2006-08-31

Det fanns synnerligen mycket svamp vid denna exkursion.

| Genus           | Epitet          | Sv. namn                  | Hotklass | Signalart | Anm.             |
|-----------------|-----------------|---------------------------|----------|-----------|------------------|
| Agaricus        | arvensis        | snöbolls champinjon       |          |           |                  |
| Agaricus        | silvaticus      | skogs champinjon          |          |           |                  |
| Albatrellus     | confluens       | brödticka                 |          |           |                  |
| Albatrellus     | ovinus          | fårticka                  |          |           |                  |
| Amanita         | fulva           | brun kamskvilling         |          |           |                  |
| Amanita         | muscaria        | röd flugsvamp             |          |           |                  |
| Amanita         | porphyria       | mörkringad flugsvamp      |          |           |                  |
| Amanita         | regalis         | brun flugsvamp            |          |           |                  |
| Amanita         | rubescens       | rodnande flugsvamp        |          |           |                  |
| Amanita         | spissa          | gråfotad flugsvamp        |          |           |                  |
| Amanita         | vaginata        | grå kamskvilling          |          |           |                  |
| Boletus         | badius          | brunsopp                  |          |           |                  |
| Boletus         | chrysenteron    | rutsopp                   |          |           |                  |
| Boletus         | luridiformis    | blodsopp                  |          | signalart |                  |
| Boletus         | luridis         | eldsopp                   |          | signalart | US panncentralen |
| Boletus         | subtomentosus   | sammetsopp                |          |           |                  |
| Calocera        | viscosa         | gullhorn                  |          |           |                  |
| Cantharellus    | cibarius        | kantarell                 |          |           |                  |
| Chalciporus     | piperatus       | pepparsopp                |          |           |                  |
| Chroogomphus    | rutilus         | rabarbersvamp             |          |           |                  |
| Clavariadelphus | sp.             | klubbsvamp                |          |           |                  |
| Clitocybe       | gibba           | sommartrattskivling       |          |           |                  |
| Clitocybe       | odora           | grön trattskivling        |          |           |                  |
| Cortinarius     | armillatus      | rödbandad spindling       |          |           |                  |
| Cortinarius     | bolaris         | brokspindling             |          |           |                  |
| Cortinarius     | collinitus      | violetfotad slemspindling |          |           |                  |
| Cortinarius     | cyanites        | rodnande spindling        |          |           |                  |
| Cortinarius     | lividoochraceus | rynkspindling             |          |           |                  |
| Cortinarius     | multiformis     | lökspindling              |          |           |                  |
| Cortinarius     | semisanguineus  | rödskivig kanelspindling  |          |           |                  |
| Cortinarius     | traganus        | bockspindling             |          |           |                  |
| Cystoderma      | sp.             | grynskvilling             |          |           |                  |
| Fomes           | fomentarius     | fnöskticka                |          |           |                  |
| Fomitopsis      | pinicola        | klibbticka                |          |           |                  |
| Gloeophyllum    | sepiarium       | vedmussling               |          |           |                  |
| Gomphidius      | glutinosus      | citronslem skivling       |          |           |                  |
| Heterobasidion  | annosum         | rotticka                  |          |           |                  |
| Hydnus          | repandum        | blek taggsvamp            |          |           |                  |
